

Universal Health Organisation (UHO)

Weekly Newsletter – 11 Aug 2023

The weekly newsletters bring the updates on the science, battered and bruised during the pandemic, legal updates and impact of activism for a just society, across the world. These are small steps to promote Transparency, Empowerment and Accountability – the ethos of the UHO.

Pandemic Paranoia: Putting the Cart before the Horse – Jobs Against the unknown!

Strange but true – if we thought that all records in vaccine development were broken in the last pandemic, think again. Scientists in [UK laboratories](#) are working to develop jabs against the next pandemic due to Disease X. This project is being done in government laboratories by over 200 scientists. They are working on a list of animal pathogens which have potential to spill over into humans. Which of them will break through they don't know – that is why they term it Disease X! The homework for the jabs has started before the pandemic! Perhaps “Pandemic Paranoia” will be the new normal.

A couple of months ago our Health Secretary Mr Rajesh Bhushan gave a [statement](#) that the next pandemic will hit us before we have time to sign the WHO pandemic treaty. He was supported by the WHO representative. The blue print for the proposed pandemic treaty being pushed by the WHO has all the draconian provisions which were clumsily implemented in the Covid-19 pandemic with disastrous outcomes. Connecting the dots is disturbing. If the Pandemic Treaty comes in force, all democracies will degenerate into [fascism](#).

WHO's “Fear is the Key” Strategy gets a boost with appointment of Professor Susan Michie.

As if things were not bad enough for the discredited WHO it lost further credibility with the [appointment](#) of Professor Susan Michie as the chair of the WHO's Technical Advisory Group (TAG) on Behavioral Insights and Sciences for Health. She is director of the Department of Behavior Change at University College of London and member of the Communist Party of Britain for over forty years.

What are most concerning are her highly unscientific and repressive views during the current pandemic. She made headlines when she, as a member of the UK's Scientific Advisory Group for Emergencies (SAGE), recommended stringent Covid-19 restrictions saying that face masks and social distancing should continue forever not only for Covid-19 but for other diseases as well!

UHO fears her immense potential as a Behavioral Scientist to bring about “mass formation psychosis” and widespread population level panic in future pandemics which the WHO and other discredited organizations including most world governments backed by big pharma and globalists, seem to be eagerly looking forward to.

It is becoming clear that our daily life is increasingly being [controlled](#) by the global elite challenging our democratic rights by spreading panic so that people happily relinquish their autonomy. Our analysis of the events of the past three years suggests that behavioral scientists like Prof Michie employ a three pronged psychological strategy to control the masses – firstly, identify restrictions that

can be imposed abruptly for shock and awe (e.g. the world's greatest lockdown at 4 hours notice!); secondly, claim that there is an existential threat such as a pandemic from unknown disease (disease X), climate change, etc; and lastly, deploy coercion, mandates, propaganda, censorship, and psychological manipulation to promote compliance with unscientific and illogical restrictions.

All roads seem to be leading to the WHO Pandemic Treaty.

Meanwhile the mainstream media, WHO and celebrity doctors continue to flog a dead horse.

The mainstream media is not giving up on Covid-19. As people go about their daily activities the mainstream media is carrying news of yet another variant which is spreading rapidly in USA, Japan and also have been detected in Maharashtra, India. The new variant, named [Eris](#) is a sub-variant of Omicron the emergence of which actually should have spelled the end of the pandemic. However, beating a dead horse, the WHO Director General Tedros, has warned people to stay protected with vaccines and Covid Appropriate Behavior to limit the spread. Dr Ravi Shekhar Jha, Head of Respiratory Medicine at Escorts Hospital Faridabad also [regretted](#) that "Covid Appropriate Behavior" is being ignored by the people.

The UHO Calls for Debate on the Violation of Scientific and Ethical Principles during the Pandemic.

The UHO calls for debate on the violation of scientific and ethical principles during the pandemic and the collateral harms as a consequence. It is regrettable, that instead of learning from the mistakes, the same unscientific measures are being articulated along with active attempts at fear mongering. It is high time that the members of the medical fraternity and scientists along with civic society activists came out openly challenging these illogical measures. The proposed WHO Pandemic Treaty which poses a serious threat to our democracy on the eve of our Independence Day should be urgently and vehemently opposed by all citizens of our free country. Let us take this oath on our Independence Day.
